

----- FOR IMMEDIATE RELEASE -----

Prepare for the Storm Season with Delmhorst Moisture Meters!

The National Oceanic and Atmospheric Administration (NOAA) has predicted 12 to 16 named storms, 6 to 9 hurricanes, and 2 to 5 major hurricanes for the 2008 hurricane season, which runs from June 1 to November 30. With a major storm season upon us, Delmhorst is encouraging restoration dealers to stock their shelves now in preparation for the imminent need for moisture meters.

When disaster strikes, it is vital to have the right tool for the job. Homes and offices affected by severe storms and flooding often have damage throughout their entire structure. To keep track of such demanding restoration efforts, Delmhorst offers the **Navigator Pro** which stores moisture content data the way you collect it, one room at a time. Navigator Pro is also a 3-in-1 meter with pin mode, pin-less scan mode, and a thermo-hygrometer that calculates temperature, RH, GPP, and dew point.

During such trying times, the Delmhorst customer service and technical support team will help select the right meter for the job, and answer any questions that come up at the jobsite. Made in the USA for over 60 years, Delmhorst moisture meters are designed for success and made to last. For when accuracy is the point, Delmhorst delivers.
