

----- FOR IMMEDIATE RELEASE -----

A Successful Year for TechCheck from Delmhorst!

Introduced just over a year ago, TechCheck has garnered high praise from customers as being an extremely effective tool, in a user friendly package. Technicians asked for an alternative to other 2-in-1 meters on the market and Delmhorst delivered a meter engineered and designed to meet their specific needs.

TechCheck has a large screen, and includes features not found in any other 2-in-1 meters: user-adjustable alarm, backlit screen, and reading "Hold" feature,. TechCheck is made in the USA with sturdy construction and comes in a hard plastic carrying case. With these features, TechCheck has the most value of any 2-in-1 moisture meter on the market today.

Thanks to solid support, TechCheck is available across Delmhorst's wide distributor network. Find out more about this great product by visiting the Delmhorst web site at www.delmhorst.com.
