****December 2003 -- FOR IMMEDIATE RELEASE****

Delmhorst Instrument Co. responds to their customers needs once again!

Restoration contractors know the importance of accurate moisture readings in a sub floor beneath saturated carpet. Delmhorst recognized this need and recently developed non-conductive caps that fit over the retainers on our 26-ES slide hammer electrode. Using these caps will ensure that wet carpet fibers do not impact meter readings.

“For nearly 60 years, we have provided the industry with the highest quality moisture meters. We are pleased to offer this additional spare part to the 26-ES in order to provide further insulation beyond the 496 pins,” notes Paul Laurenzi, Vice President -- Sales and Marketing at Delmhorst.”

Delmhorst – when accuracy is the point!
